EDUCATION

Northeastern University

Bachelor of Science in Computer Science

GPA: 3.84/4.00 • Dean's List: Fall 2023, Spring 2024

Relevant Coursework: Distributed Systems, Object-Oriented Design, Computer Organization, Logic and Computation, Web Design

Certification: Google AI Professional Certificate

Boston, MA

Expected Aug. 2027

EXPERIENCE

AI Software Engineer Co-op

Sep. 8 - Dec. 18, 2026

NExT Consulting, Northeastern University

Boston, MA

- Develop AI-enabled applications and internal tools for client engagements, contributing across requirements discovery, solution design, implementation, testing, and stakeholder handoff.
- Translate business needs into technical requirements, API integrations, and rapid prototypes while collaborating within an Agile consulting team.
- Build reusable components, document technical decisions, and evaluate AI-assisted workflows for reliability, usability, and maintainability.

IT Systems Administrator

May 2023 - Present

AL Prime Energy

Saugus, MA

- Administer IT, networking, surveillance, and fuel-pump technology across 70 sites and 1,000+ cameras, supporting Digital Watchdog, iCMSpro, Socatch, and Rubis systems.
- Diagnose and resolve network connectivity, hardware, software, and camera-system incidents across distributed locations to minimize downtime and maintain operations.

AI Software Engineer Intern

May 2024 - Aug. 2024

Ya Hala FM

Dallas, TX

- Built automation scripts and internal tools to organize a 4,000+ song media library across cloud and local storage, eliminating approximately 30 hours of manual organization per week.
- Developed, tested, and debugged repeatable workflows for sorting, renaming, and validating media assets across cloud and local storage environments.

LEADERSHIP

Founder & President

Nov. 2025 - Present

LibyanClub, Northeastern University

Boston, MA

- Founded the first Libyan student association in the United States and grew its social presence to 55K+ followers in under six months (+8,000%).
- Generated 20M+ views, 1M+ interactions, and 2.5M+ unique accounts reached through educational content, campaigns, and community initiatives.
- Launched #CleanLibya, growing a grassroots cleanup challenge from 4 friends to thousands of participants and supporters across six Libyan cities and earning national television coverage.
- Built AI-supported workflows for content production, analytics, and campaign planning; coordinated collaboration among emerging Libyan student groups nationwide and became a finalist for Northeastern's Global Influence Award.

PROJECTS

LibyaMed Dispatch | Next.js, React, TypeScript, ElevenLabs, Twilio, Supabase

- Built a bilingual English/Arabic AI emergency-intake dashboard in Next.js, React, and TypeScript, integrating ElevenLabs voice, Twilio/WhatsApp, and a Supabase-ready schema.
- Reduced runtime memory from approximately 5.1 GB to 117 MB and delivered 49 unit tests plus 6 end-to-end tests for critical workflows.

AI Voice Receptionist | ElevenLabs, Webhooks, Google Calendar API

- Integrated ElevenLabs, webhooks, and the Google Calendar API to capture caller details, check availability, create appointments, and return booking confirmations without staff intervention.

Soccer Vision Analytics | YOLOv8, Object Tracking, Video Summarization

- Built a YOLOv8 computer-vision pipeline with object tracking and automated video summarization to map player movement, generate highlights, and surface performance insights.

LLM Content System | LLMs, Analytics, Workflow Automation

- Built an LLM-powered content system that generates video ideas, scripts, titles, and captions, with feedback loops tuned to retention and engagement metrics.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS

Frameworks & AI: React, Next.js, YOLOv8, LLM Applications, AI Agents, Computer Vision, Prompt Engineering

Tools & Platforms: Git/GitHub, Supabase, Twilio, ElevenLabs, Google Calendar API, Zapier, Vercel, Render

APIs, Testing & Practices: REST APIs, Webhooks, Unit Testing, End-to-End Testing, Agile Development

Spoken Languages: Arabic and English (fluent); Spanish (conversational)
